Campus memories are forever mixed with romance for Redbird couples who married.
February is a milestone month at Illinois State, as the campus community comes together to celebrate the University’s establishment in 1857. Founders Day is an annual tradition that invokes reflection on the various stages of the institution’s development, from a Normal school with one proud building to the high-tech campus we appreciate today.

The transformation is nothing short of amazing, and is often conveyed in statistical terms. Illinois State has grown from a first class of 43 students to today’s enrollment of 20,450. Faculty and staff ranks have increased simultaneously from a few individuals 150 years ago to more than 3,000. The curriculum has expanded from a singular focus on preparing teachers to now providing students options across six colleges. There are 67 undergraduate programs in more than 188 fields of study, as well as 39 master’s, two specialist, and eight doctoral programs at the graduate level.

The numbers are impressive, but what I find even more fascinating are the personal memories that surface as graduates from past eras share their collegiate experiences. Who better to narrate such a nostalgic journey than alumni who met at Illinois State and later married?

In this issue you will meet a couple from every decade since the 1930s. Each couple’s unique story gives a glimpse of how campus life has changed at Illinois State, revealing the essence of your alma mater over time. But there is a common thread as well. These alumni united through romance all express Redbird pride as they recall simple pleasures tied to treasured times at this very special place. Their anecdotal details truly bring the University’s rich history to life. I can think of no better way to celebrate Illinois State’s anniversary than through their eyes.

Al Bowman
President, Illinois State University
Bonded as 'Birds

Individuals from across the decades have found their soul mate while enrolled at the University. For some romance started simply with a 20-cent sandwich, a dorm light shining during winter break, construction of a homecoming float, or a midnight study break. Cover:

A chance encounter at a roller-skating party in 1935 was the start of a wonderful relationship for Verda (Stahly) ’38 and Robert Maurer ’37, who married in 1940. Their portraits from ISNU days, inset, were taken for the Index.

2 UNIVERSITY NEWS

13 TWO GREEN THUMBS

Don Schmidt, M.S. ’88, stopped studying architecture when he realized a passion for plants. His graduate work led him to his role as the Department of Biological Sciences horticulturist. Now an icon on campus, Schmidt’s enthusiasm for all things growing is reflected in his teaching, during public tree walks, and as WGLT’s Dean of Green.

16 PATH TO THE PRESIDENCY

While Americans watched Barack Obama’s campaign sweep the nation last year, Zach Koutsky ’06 and Michael Halle ’06 were working for the future president. Hired staff members on board from the early primaries, both alums spent last fall getting out the vote in North Carolina. Their experiences in the historic election are moments neither will ever forget.

20 ATTITUDE OF GRATITUDE

Jean Borg ’50 was grateful for the opportunity to study at Illinois State. A scholarship allowed her to complete the training she needed to teach. Now retired from a career as an esteemed educator, Borg has shown appreciation for her family and her university by extending a helping hand to undergraduates at her alma mater.

28 CLASS NOTES
Students have the opportunity to gain international consulting experience while still in college.

Global educational opportunities are growing for students through the College of Business (COB) and College of Applied Science and Technology (CAST) Export Project, which aids U.S. companies eager to expand internationally.

The Export Project pairs interdisciplinary students and faculty with U.S. companies. Since its start in 2005, team members have helped businesses develop market entry strategies in New Zealand, Germany, and Argentina.

Illinois water treatment expert Carus Corporation was a client last year. The company sought assistance in examining uses for its products in Argentina. Students investigated the industry, logistics, legal, tax, trade policy, competitor, and final user issues. They spent three weeks in Buenos Aires and surrounding areas.

Premium sunwear manufacturer Maui Jim based in Peoria was another 2008 client. A student consulting team developed a market entry model applicable to all markets Maui Jim plans to enter. Argentina was used as a case study.

In Buenos Aires team members met with real estate agents to discuss distribution center location options, a law firm for incorporation questions, temp agencies to explore staffing considerations, a customs broker to learn about potential import challenges, and trade associations to collect market size information. The team blanketed upscale optical shops to evaluate the competition.

Participating students built skill sets under challenging conditions. As COB Assistant Professor Peter Kaufman notes, “How many students have the opportunity to claim international consulting experience on their resumes while still in college?!”

Kaufman and Iris Varner are the principal directors of the two-year, $165,000 grant from the U.S. Department of Education. They are supported by Mark Hoelscher, Klaus Schmidt, and Aslihan Spaulding.

The current grant along with matching college funds allows Illinois State to reach out and develop relationships with companies, which enhances the University’s reputation. New grant proposals are being written by the faculty team to support the program into the future.

This academic year Export Project teams will be in China, India, and possibly Poland. Twelve undergraduate and graduate students will work with five faculty project managers. Companies participating include SunOpta of Minnesota, and Illinois firms Dickey-John, Filtration Group, Brandt Consolidated, and National Enrichment Industries.

Companies interested in learning more about the program and how to participate should e-mail Varner at izvarner@ilstu.edu or Kaufman at pkaufma@ilstu.edu. They are also the contact for individuals interested in providing scholarships needed to support students as they travel abroad.
GROUND BROKEN AT SITE FOR HEALTH, FITNESS CENTER
A groundbreaking ceremony held during Homecoming marked the official start of the Student Fitness and Kinesiology/Recreation Building project. The 170,000-square-foot center will stand at the former site of Dunn-Barton and Walker residence halls.

The building is the largest capital project in the University’s history, and is expected to be completed in 2010 at a cost of approximately $50 million. It will become the campus Recreation Center and home to the School of Kinesiology, with more than 20,000 square feet dedicated to classroom and laboratory space. A walkway will connect the building to McCormick Hall on the Quad.

“The form and function of this building will draw students to ISU,” President Al Bowman said. “It is truly a marriage of academic excellence and physical wellbeing.”

MENNONITE CAPTURES NATIONAL NURSING EDUCATION AWARD
Mennonite College of Nursing has received the Outstanding School of Nursing Communications Award in recognition of its effective Web site and print communications. The award is presented by the American Association of Colleges of Nursing (AACN) in collaboration with the John A. Hartford Foundation Institute for Geriatric Nursing and New York University.

The communications honor recognizes Mennonite’s effective use of Web and print-based communications to convey the college’s commitment to high-quality nursing care for vulnerable and underserved older adults. It was presented as part of the 2008 Awards for Excellence in Gerontological Nursing Education.

“This is an award that will bring continued national exposure to the college and university,” said Sara Campbell, Mennonite College of Nursing interim dean. “It is the collaboration of many that resulted in Mennonite receiving this award. Numerous people in the college, as well as University Marketing and Communications and Institutional Web Support Services, contributed to this honor.”

Mennonite’s Web site highlights two new initiatives specifically focused on preparing nurses at the graduate level to practice and conduct research with older adults.

Printed materials reflect a positive view of aging, and the importance of providing high-quality geriatric nursing care. Annual reports highlight important initiatives that involve nursing care of aging adults.

The Teaching Nursing Home Project, funded by the Illinois Department of Health, is designed to transform long-term care throughout Illinois by encouraging students to choose careers in those facilities.

ILLINOIS STATE RETAINS NATIONAL RANKING FOR BEST VALUE
For the fifth straight time Illinois State has ranked as one of the 100 best values in public colleges in the country, according to Kiplinger’s Personal Finance magazine. The December issue ranked the University 94th on the list, up six spots from last year.

Kiplinger’s list focuses on schools that offer a “combination of outstanding academic quality and an affordable price tag.” The magazine places greater overall weight on quality, which accounts for about two-thirds of the final score, than on cost.

The University of Illinois was the only other state university to make the list. Other institutions from across the country include the University of North Carolina at Chapel Hill, University of California, and University of Arizona.

“It is a testament to the quality of our students, faculty, and staff, and our academic and support programs that Illinois State has made the Kiplinger list for five straight editions,” said President Al Bowman.

“The fact that it has happened in the midst of a state economy that has cost the University tens of millions of dollars makes the ranking even more remarkable,” Bowman said. “To be in the company of some of the finest public institutions in the nation is one more indicator that we are achieving our goals through the University’s strategic plan, Educating Illinois.”

PRESIDENT BOWMAN CHOSEN TO SERVE ON NATIONAL CABINET
Illinois State University President Al Bowman is the only Illinois education leader to be named a member of the nation’s first Higher Education Cabinet, which was created by The New York Times and The Chronicle of Higher Education.

The cabinet is comprised of presidents, trustees, and leaders from 76 universities and related associations. Members will work to identify trends and direct discussions about the most pressing issues facing higher education today.

“It is an honor to be selected as part of this cabinet,” said Bowman, who will join leaders from institutions such as University of Notre Dame, Syracuse University, and George Washington University. Members represent public and private colleges of varying size, and represent institutions from around the nation.

“This group, supported by the power and credibility of The New York Times and The Chronicle of Higher Education, will be an important, fresh voice for higher education across the country,” Bowman said.

ADMINISTRATORS ADVISE ON CURRICULA ENRICHMENT
Two Illinois State administrators spoke last fall to a special U.S. Senate caucus in Washington, D.C., about ways to enhance the teaching of STEM disciplines (science, technology, engineering and mathematics) in secondary schools.
Rodney Custer, associate vice president for research, graduate, and international studies; and Jenny Daugherty, managing director of the Center for Mathematics, Science and Technology (CeMaST), spoke to members of the Senate STEM Caucus about effective ways to introduce more engineering-related concepts into secondary school STEM curricula.

Custer and Daugherty discussed the implementation of professional development opportunities for in-service STEM discipline teachers, with an emphasis on technology and engineering components. That emphasis is particularly important because the engineering profession is concerned about recruiting highly talented students into engineering programs. At the same time, mathematicians and science educators are looking for authentic, real world contexts for their teaching content.

A past chair of Illinois State’s Department of Technology, Custer is a nationally recognized authority on technology teacher education and STEM discipline curriculum development. As CeMaST managing director, Daugherty supports a number of STEM discipline teacher education and professional development partnership projects between Illinois State and school districts across Illinois.

**Garden project at Ewing Manor takes national honor**

The University’s Facilities Management Grounds Department has won the Professional Grounds Management Society (PGMS) Green Star Honor Award for the Genevieve Green Gardens at Ewing Manor. This is the 11th national award for the campus, and the second award for the Genevieve Green Gardens.

“The award is the ultimate compliment from our peers in the green industry,” Assistant Director of Grounds Operations Darcy Loy said. “It recognizes the quality standards that Illinois State’s Grounds Department sets, not only for the gardens but for the entire campus.”

The majority of PGMS members are institutional grounds managers who work for organizations such as universities, municipalities, and parks. Past Winners of the PGMS Green Star Awards include the George Bush Presidential Library Complex, Grand Ole Opry, Longaberger Corporate Headquarters, and Sea World in Orlando, Florida.

Completed in the spring of 2008, the Genevieve Green Gardens also received the City of Bloomington’s Beautification Award.

**NATIONAL GRANT BOLSTERS CHICAGO TEACHER PLACEMENT EFFORT**

Illinois State will place more new math and science teachers in Chicago Public Schools as a result of a four-year, $750,000 grant from the National Science Foundation’s Robert Noyce Teacher Scholarship program.

The grant provides stipends and scholarships for 40 pre-service teacher education students in mathematics, biological sciences, and chemistry. Participants will commit to teach for at least two years in Chicago upon completing their teacher certification.

Awardees will receive at least $10,000 per year, and have their tuition and fees waived by Illinois State. The University is also adding a $5,000 stipend for students who are changing their careers to become teachers, and hold a bachelor’s degrees. The awards will cover the last two years of pre-service teacher education at Illinois State.

The program fills a need the Chicago school district has identified in its teacher recruitment efforts. It will “provide pre-service teachers with the financial resources to finish their education at Illinois State and then bring their knowledge and enthusiasm to urban classrooms,” said Illinois State President Al Bowman. He noted the program is “a true benefit to both our teacher education students, and to the students in Chicago Public Schools.”

**DEAN POSITION ANNOUNCED FOR TWO COLLEGES**

James E. Major has been named dean of the College of Fine Arts (CFA), with Jeff Wood chosen as College of Applied Science and Technology (CAST) dean.

Major served as the CFA dean on an interim basis since May of 2007. He joined the faculty in 1995 as director of choral activities, and became director of the School of Music in January of 2000. He was conductor of the Madrigal Singers and artistic director of the Madrigal Dinners at Illinois State for 11 years.

A native of Meredosia, Major received his Ph.D. from the University of Wisconsin. Before coming to Illinois
Alumni

REUNIONS SET FOR CLASS OF 1959 AND HALF CENTURY CLUB

Members of the Class of 1959 will celebrate their 50th class reunion on May 14th and 15th during the annual Half Century Club spring event. They will be inducted into the Half Century Club at dinner on Thursday, and join the Half Century Club for a full day of activities on Friday.

The Half Century Club honors all alumni whose classes graduated 50 or more years ago. There are no dues to belong. The annual spring program gives alumni an opportunity to catch up with classmates, make new acquaintances, and learn what’s new at Illinois State.

Members of the classes of 1954, 1949, 1945, 1939, and 1934 who will be celebrating their 55th, 60th, 70th, and 75th reunions from Illinois State Normal University will be honored at a Friday luncheon. Attendees will receive a special recognition gift.

For additional information contact Alumni Relations at (309) 438-2586 or (800) 366-4478, or e-mail Special Events Coordinator Kim Chickering at krchick@ilstu.edu.

ANNUAL ALUMNI SURVEY BEGINS AGAIN THIS SPRING

Members of the graduating classes of 2008 and 2004 will be receiving a letter in April from Illinois State President Al Bowman as an invitation to participate in the Annual Alumni Survey. Personalized instructions will be included in the mailing.

Information provided through the online survey will be used to improve the educational experience at Illinois State. Contact the University Assessment Office at (309) 838-7021 for additional information, or send an e-mail to mb fuller@ilstu.edu.

TUITION WAIVER AVAILABLE FOR LEGACY STUDENTS

The University’s Alumni Association offers an opportunity for dependent children of Illinois State graduates who live outside Illinois to attend the University at in-state tuition rates. The 2008-2009 recipient of the waiver was Carrie Schrader, daughter of Brian ’78 and Debra ’78 (Flittner) Schrader of Waukesha, Wisconsin.

A limited number of nonresident legacy student tuition waivers will be awarded for the 2009-2010 academic year. Application is required by March 2. Students new to Illinois State in the fall of 2009 as either a freshman or transfer student are eligible. Recipients must plan to enroll as a full-time student, meet admission requirements, apply to the University by the established admission deadline, be a dependent child of a graduate of Illinois State who is an active member of the Alumni Association, and live outside of Illinois.

Go online at www.alumni.ilstu.edu/about_us/scholarships for more information, or contact Alumni Relations Executive Director Stephanie Epp, Ed.D. ’07, at sa epp@ IllinoisState.edu.

SCHOLARSHIPS CREATED TO BENEFIT COLLEGE OF BUSINESS STUDENTS

Two new scholarships for students in Illinois State’s College of Business have been made possible through the Flessner Family Endowed Scholarship Fund. The fund was established by Paul Flessner, a 1981 graduate of Illinois State’s business information systems program. He is a retired Microsoft senior vice president.

The Flessner Family Endowed Scholarship Fund supports the annual Donald J. Flessner Endowed Scholarship, awarded to a new freshman majoring in accountancy. The scholarship is named for Paul Flessner’s father, Donald, a businessman and long-time mayor of Roberts.

The Fund also supports the annual Dr. Gerry McKean Endowed Scholarship, awarded to a junior or senior majoring in business information systems. The scholarship honors one of Paul Flessner’s former professors, Gerry McKean, a retired business information systems faculty member.

Paul Flessner, a member of Illinois State’s College of Business Hall of Fame, was instrumental in leading Microsoft’s efforts in the development of software for servers. He received Microsoft’s 2008 Technical Recognition Award for his leadership of the SQL Server 7.0 Team.

The $100,000 in funding for the scholarship endowment was contributed by Microsoft on behalf of Paul Flessner. The funding is part of the company’s philanthropic efforts to support education and communities across the globe.
Athletics

COACHING LEGEND INDUCTED INTO VALLEY HALL OF FAME

In honor of his coaching achievements at Illinois State, former head track and field and cross country coach John Coughlan is one of six members of the 2009 Missouri Valley Conference (MVC) Hall of Fame inductees. He will be inducted during the State Farm MVC men’s basketball tournament in March.

Coughlan is the most decorated track and field/cross country head coach in Redbird history. He guided the men’s program for 23 seasons, and the women’s squad for eight campaigns. He led the Redbirds to 25 league championships, and mentored 291 MVC individual champions. Valley Coach of the Year 24 times, Coughlan took district coach-of-the-year honors nine times.

On the national level he shepherded 195 student-athletes to the NCAA Championships in 18 different track events, producing 37 All-Americans. Illinois State placed in the NCAA Championship top-25 on five occasions. He was named national coach of the year in 1995.

Coughlan, who retired in 2000, is a member of the Illinois State Athletics Hall of Fame, the Drake Relays Hall of Fame, and the U.S. Track and Field and Cross Country Coaches Association Hall of Fame.

FORMER REDBIRD ENTERS CHICAGOLAND HALL OF FAME

Former Illinois State student-athlete and National Football League defensive back Mike Prior ’85 was inducted into the Chicagoland Sports Hall of Fame last fall. A native of Chicago Heights, Prior was a defensive back with the Green Bay Packers from 1993-1998. He participated in two Super Bowls, and had an interception in Super Bowl XXXI. Before joining the Packers, Prior spent six seasons in Indianapolis with the Colts and two with the Tampa Bay Buccaneers.

While at Illinois State Prior was a two-sport athlete lettering with both the football and baseball teams. He still ranks first in Illinois State history for career interceptions with 24, and also tops the all-time career punt return yards list with 906. His baseball statistics include a career batting average of .388, and a career slugging percentage of .715. Both are still Redbird records.

TWO CHOSEN AS STUDENT-ATHLETES OF THE YEAR

Senior football player Kedric Meredith and former swimmer Tracy Deyell ’08 were named top athletes for the 2007-2008 season during the State Farm Student-Athlete Academic Excellence Banquet held last fall.

Meredith received the Doug Collins Male Scholar-Athlete of the Year award, which is named after Redbird basketball legend Doug Collins ’73. Meredith started every game last season. He set career highs with 16 catches for 179 yards and two touchdowns. He averaged 11.2 yards

BLACK COLLEAGUES ASSOCIATION SCHOLARSHIPS AWARDED

Members of the Black Colleagues Association continue their efforts to support students financially. Funds from four scholarships were awarded last fall during Homecoming, including the Judge Russell R. DeBow Scholarship and Vincent Lionel Davis Scholarship.

Seniors Katona Johnson and Ronnell Robinzine, sophomore Lorrlyn Neeley, and freshman Karyn Burns received $1,000 from the DeBow fund. A 1935 graduate, DeBow was awarded the University’s Distinguished Alumni Award in 1976.

Sophomore Keisha Fletcher was awarded $1,000 from the Vincent Lionel Davis Scholarship. The fund honors the memory of the 1981 graduate, who died in the line of duty as an employee of the Dallas fire department.

Freshman Gordon Booker received the President’s Book Scholarship, which is sponsored by President Al Bowman. Graduate student Jessica Brumfield received the Vice President for Student Affairs’ Book Scholarship, which was awarded for the first time.

The seven recipients received assistance for the 2008-2009 academic year. Entering and continuing African American undergraduate and graduate students are eligible to apply. Applications for the 2009-2010 academic year will be available in March. Additional information is online at www.alumni.ilstu.edu/about_us/scholarships or by e-mail to khowell@ilstu.edu. The application deadline is May 1.

Individuals interested in contributing to the DeBow or Davis scholarship funds can do so by going to www.alumni.ilstu.edu/giving.

Illinois State University Black Colleagues Association Scholarship Recipients include, from left, Lorrryn Neeley, Ronnell Robinzine, and Jessica Brumfield
per catch, and was instrumental in the Redbird running game.

He is a member of Student Accounting Society, the American Institute of Certified Public Accounts, the National Association of Black Accountants, and was named captain of his Scholar-Bal-

terTM team. He has a 3.34 cumulative grade point average in accounting and finance, and is an eight-time member of the AFNI Athletics Honor Roll.

Deyell received the Linda Herman Female Scholar-Athlete of the Year award, which is named after longtime Illinois State coach and administrator Linda Herman. Deyell set the University record in the 200-yard breaststroke and the 200-yard individual medley (IM), as well as the Missouri Valley Conference (MVC) record in the 400-yard IM last season.

She was an All-Valley performer, an MVC Scholar-Athlete, and an ESPN The Magazine/CoSIDA Academic All-District V selection. She completed a sociology degree with a 3.98 cumulative grade point average, received the MVC Presi-
dent’s Council Academic Award, and was named to the MVC Honor Roll. She was a member of the AFNI Honor Roll every semester at Illinois State.
Mari Prepejchal ‘00, M.S. ‘02, wasn’t looking for love while studying sociology and psychology. She in fact hadn’t paid much attention to fellow psychology student Daniel Brzostowski ‘99, M.S. ‘01, when they shared a class her freshman year.

She didn’t think much of it when they met again while Mari was competing on the Illinois State Bowling Team, as Dan was a friend of a teammate. But then their paths crossed off campus as well.

“As part of our master’s program we each had to intern at a local social service agency. Since I was a year behind Dan, I ended up taking his position at the Baby Fold, and once again we were sharing friends and coworkers,” Mari recalled.

It was after Dan had graduated and returned for a campus visit with mutual friends that he and Mari really started talking. They realized all they had in common, including the honors psychology class they’d completed with Professor James Johnson.

That conversation led to dating, and the two remained a couple after finishing their degrees. When the time came for a marriage proposal, Dan wanted the memorable moment to be on the campus that brought them together.

“Dan planned an elaborate weekend trip to Illinois State during Spring Fling in April of 2007. He had been talking to several friends, Dr. Johnson, and our Baby Fold supervisor, Susan Bellas,” Mari said. They teamed together without Mari’s knowledge for a campus scavenger hunt.

“I visited Haynie Hall, Avanti’s, and the Bowling and Billiards Center to get clues that took me to the next location,” Mari said. “Dr. Johnson and the last clue eventually led me to Daniel behind Stevenson Hall, waiting to propose.”

The wedding date was May 31, 2008. “Several of our attendants graduated from Illinois State. Even our professor whose class we met in attended our wedding,” Mari said. “Our guests sat at tables that were named with Illinois State themes.”
Today Mari and Dan live in Buffalo Grove. She is as an outpatient therapist at Alexian Brothers Center for Mental Health, and he works in private practice as an outpatient therapist with Arbor Counseling Center.

“We try to get back to Illinois State as often as possible,” Mari said. “We continue to reminisce about the time we spent there, and how it helped to form our relationship.”

Dan and Mari are not alone in finding romance while enrolled at the University. There are 14,023 married or partnered alumni couples scattered across the country. Their unique stories give a glimpse of Illinois State through time, and confirm there is no stronger campus connection than two Redbirds in love.

Verda (Stahly) and Robert Maurer

It cost $165 total to attend Illinois State Normal University when Bob Maurer ’37 enrolled, and yet he wasn’t sure he could afford it. His savings was in a bank he feared would fold during the Depression.

Verda Stahly ’38 came to campus equally concerned about the dollar. “The times were so horrible. It was such a privilege to get to go to college,” said Verda, who studied home economics and science.

Bob majored in agriculture and was on the track team. He was an officer in the department’s Maize Grange club, which hosted a roller-skating party in 1935. It was there the two met. Bob skated up and made Verda his partner with a little tap.

“I knew when I tagged her she was the one,” he said. “It was love at first sight.”

Their dates were restricted, as Verda was under a 10:30 p.m. curfew, and the eyes of Jessie Rambo—who monitored the conduct of all women. Campus fun consisted of Sock Hops, cards played in Old Main, and bands in McCormick, which was one of few buildings standing. Only a few had cars so Verda and Bob walked to the Normal bakery, where day-old bread was a nickel. A quart of milk cost another five cents.

“We could get five-cent hamburgers at a place called Mel Tam,” Bob said, recalling the favorite spot near where the Alamo II now stands. But the two couldn’t study together at the library.

“That was really frowned upon,” Verda said, noting in those days dating was discreet. Married women weren’t admitted to the University. Liquor and cigarettes were banned as well, and those caught with either were immediately expelled.

Jobs were hard to find with the onset of World War II soon after their graduation, however, Verda started teaching in rural Springfield. Weekend dates and letters kept the two connected as Bob taught in Hopedale.

Verda wasn’t allowed to teach after the two married on June 28, 1940. They relocated to Fairbury, where Bob served 50 years as a bank real estate and loan officer. Verda returned to the classroom after their two children were older, retiring in 1972.

Now living in Bloomington, their lives are full with five grandchildren, one great-grandchild, and a wealth of happy memories that started at the roller rink some 70 years ago.
Muriel (Gresham) and Albert Garber

As chair of the 1948 Homecoming float for the social science majors, Muriel Gresham ‘49 had a big job to complete. Fellow major Albert Garber ‘51, M.S. ‘53, volunteered his help, which is how he met his future bride.

“We made boxes with the numbers of football players on them,” said Albert, who was an older student when the two met. He was a World War II veteran living in the campus barracks, while Muriel lived in Fell Hall.

Their Homecoming encounter led to simple dates. “There wasn’t a whole lot to do, and we didn’t have a lot of money,” Albert said. “We went to a movie and football game once and awhile. We spent a lot of time in Milner Library.”

Because Albert’s military service delayed his education, Muriel finished her degree first. “I was still in school and she started teaching,” he said, noting Muriel’s first job was in Minonk-Dana. The two married on June 26, 1949.

Albert graduated two years later, and also began a career as an educator in Illinois. Together the two taught a combined total of six decades in the Springfield area. She worked with high school students, while Albert was an elementary and middle school teacher.

Now retired and living in Springfield, the couple enjoys spending time with their three daughters and grandchild. As they approach their 60th wedding anniversary, Albert confesses the project that brought them together is a hazy memory.

“I don’t remember the float that well to be honest,” he said, “just the boxes.”

Margaret (Tombaugh) and Owen Richardson

The Ag-Home Ec dance at McCormick in January of 1942 wasn’t appealing to then freshman Margaret Tombaugh ‘45. “I didn’t want to go, but my roommate persuaded me,” she said.

She danced with several fellas, but sophomore Owen Richardson caught her attention. “He was such a good-looking guy, I thought he’d crashed the party,” Margaret said. The attraction was mutual, and Owen asked to walk Margaret home. “He was disappointed to find out I lived a block away at Fell Hall!”

That was the first of many memorable evenings for the couple, who courted on a budget. “Our dates were long walks, an occasional movie, and sharing nickel cokes with two straws at the Co-Op. We worked hard, but we had no money,” Margaret recalled, noting their jobs ranged from milking cows on the University Farm to cleaning faculty houses.

Owen’s education was cut short to help on the family farm in Spring Grove when his father became ill. Letters kept the two united from afar for three years, as gas rationing made visits rare.

The couple married on July 21, 1945. Margaret took a teaching job near the Richardson farm, which remains their home. Parents to five and grandparents to 11, Margaret and Owen include their children in operating the farm. They sell Christmas trees and boast the World’s Largest Corn Maze (www.richardsonfarm.com).

“We’ve got three generations of the family involved,” said Margaret, grateful for a legacy that began during her “wonderful days” at ISNU.
Sheryl (Trudgian) and Dennis Jones

Dennis Jones ’66 was bored during the winter break of 1964. He stayed on campus between semesters, and buddied up with another Dunn-Barton resident to find some fun.

“We decided to see who else was still on campus. We looked over at Hamilton-Whitten and saw a couple rooms with lights on. We figured out the room numbers and called,” Dennis said. The women who answered the phone fortunately decided to take a chance.

“They were looking for something to do too,” Dennis recalled, explaining how he ended up on a blind double date with Sheryl Trudgian ’67. He was a junior and she was a freshman when they met.

“We hit it off pretty well from the start,” Dennis said. The two continued to spend time together at campus parties and dances.

With their homes less than 50 miles apart, they connected during the summer as well. The couple married on August 13, 1966.

Dennis started his teaching career while Sheryl finished her degree. He worked in middle schools, she chose early childhood education, and together they raised three daughters.

After years in the classroom the two started Whispers Bed and Breakfast in Three Rivers, Michigan. “Sherry loved the cooking, and I loved the conversation,” Dennis said of their five-year venture.

Now retired from that work, they reside in Portage, Michigan. Days are spent enjoying time with their five grandchildren, and each other. As they approach their 43rd anniversary, both remain grateful that Sheryl left her dorm light on all those years ago.

Anita (Brown) and Charles Jaeger

Anita Brown ’56 was a waitress at the Cage when she met Charles Jaeger ’55, M.S. ’61. He washed dishes at the Pilgrim, but stopped by the Cage for a meal.

“I didn’t think he paid much attention to me. He was shy,” Anita said. Charles was so bashful that their first date occurred through faculty intervention.

“The junior class was having a hayride, and Special Education Department Head Rose Parker talked him into getting a date,” Anita said. Charles left a note in Anita’s mailbox. Her roommate convinced her to go.

“It was in October of 1953, and the event was at the University Farm. We got there early and sat in the barn, reading old funny papers,” Anita said. She had no idea Charles was allergic to hay.

The two dated three years. “There was no student union, so we spent hours sitting on the stone benches on campus talking,” Anita said. “We had little money, so we took advantage of the free movies at Capen.”

They moved into a Bloomington apartment following their wedding on July 15, 1956. Each taught more than 30 years, while raising three sons. Now retired and residing in Peoria, they have eight grandchildren, and one great grandchild.

“It all started because he ordered a grilled cheese sandwich and hot chocolate,” said Anita, who prepared the combination after they married. It was then Charles confessed he hated the meal.

“The sandwich was the cheapest thing we served,” Anita said. “It was 20 cents, and that’s all he could afford.”
Carol (Sherry) and John Cogswell

Carol Sherry '73 and John Cogswell '72 both completed College of Business majors, but it was a physical education elective that brought them together.

“We met in an introductory dance class,” John said, remembering the social folk course from 1971. “The instructor started the class by having the men line up on one side, and the ladies on the other side. I was the first in line for the men, and Carol was first in line for the ladies.”

The first dance was the grand promenade. “We filed along in line pairing up, and walked around the room hand-in-hand. We were the first couple, and danced the rest of that class together,” John said. “In fact we danced almost every other dance that semester together as well.”

Their first date was a basketball game. Steak 'N Shake and Capen movies became favorites for the two, who were a steady couple by the time the dance class ended.

Married on August 18, 1973, they moved to Peoria and started careers at Keystone. Job transfers resulted in a move to Indiana. Currently semi-retired in Indianapolis, John is in real estate and Carol works for Amazon.com. They are parents of three children, and grandparents to two.

“All that from one little dance,” said John, who delights in reminding Carol about the square dance unit.

“The instructor pointed to our square and said the men were superb,” John said. “A point I often have made over the past thirty-five years is that the instructor didn’t mention the women in the square!”

Melissa (Cheek) and Scott Schneider

A study break and the need for caffeine led Melissa Cheek ’96 and Scott Schneider ’95 to the Burger King near campus one midnight in the fall of 1991.

“I lived in Walker Hall and was with a friend who knew Melissa,” Scott recalled. “Then the following week I saw her at an apartment party. Everything just took off from there.”

The two met for pizza at Garcia’s, and then scheduled a more formal date at Bennigan’s. That dinner evolved into a six-hour conversation, and started a courtship their freshman year that continued to graduation.

“Our relationship just blossomed from that point on,” said Scott, who majored in parks and recreation. Melissa was an elementary education student who became an avid Redbird fan, as Scott was a member of the men’s tennis team. “She lived in Atkin-Colby so she could watch us practice from her dorm,” Scott said.

Engaged their senior year, the two married on June 29, 1996. They moved to Indiana, where they owned multiple Video Specialty stores. Melissa taught kindergarten before they relocated to Punta Gorda, Florida. Wiped out by Hurricane Charley, they have rebuilt their lives there. They now own Sunshine Partners of Southwest Florida LLC, and Schneider Zwei LLC—a property management company and property investment company, respectively.

Parents to two children, Scott and Melissa remain loyal to Illinois State despite their distance from campus. “It was a great experience, and we loved it,” said Scott, who proves his point by noting one of their poodles, Reggie, is “named after ISU’s awesome mascot!”

Kathleen (Babica) and Edwin Pierce

Serendipity and persistence tell the story of how Ed Pierce ’81 found Kathy Babica ’88.

“The odds of us meeting were enormous,” Kathy said. “He was on a bus and I was standing in front of the Alamo II in the winter of 1986. He decided then he had to find out who the tall girl was.”

It wasn’t until spring when the two met again at a Normal print shop. “I noticed the man at the counter staring at me. It was Ed,” said Kathy, who studied mass communications. An art major, Ed spent the next nine months asking Kathy out to the movies, lunch, dinner, coffee—anything. Her answer was always a polite ‘no thank you.’

That changed with Ed’s last attempt in January of 1988, when Kathy agreed to dinner at The Grand Café in Bloomington. More dates followed, and Kathy changed her plan to pursue a career in Chicago. She opted to instead date the guy who fixed guitars and played in a local band.

The two married on June 19, 1993, with the rehearsal dinner at The Grand Café. They partnered to create Monster Pawn and Monster Deals in Bloomington-Normal. She is a member of the National Pawnbrokers Association Board of Directors.

“Twenty-one years after our first date we are still best friends, and very much in love,” Kathy said. With three children who are attending the University’s Metcalf Laboratory School, their campus ties remain strong.

“We’re not only an Illinois State connection,” Kathy said, “but an ISU family!”
Illinois State’s Don Schmidt, M.S. ’88, is a man of many faces, and two green thumbs. He is known throughout Central Illinois, among his colleagues, and by students as “the plant guy,” WGLT’s Dean of Green, and “the unofficial tree guy.” All titles stem from an expertise honed in his official role as the University’s horticulturist.

Schmidt’s job involves contributing to the lush and diverse foliage found around campus. His time and talent are vital in growing plants for the University’s use in teaching, research, and student labs.

BY STEVEN BARCUS

Though Schmidt always carried a deep-seeded interest in plants, he originally planned to study architecture. “I didn’t even know it was possible to study horticulture. Then I was walking around the University of Illinois campus and saw the Ornamental Horticulture Building. I thought, ‘Oh wow. You can get a degree in that?’ I found out you can, and I did,” Schmidt said, recalling his undergraduate days.

He obtained a bachelor’s degree in horticulture, and became involved with landscaping and nurseries. Years later he came to Illinois State as a graduate student in the Department of Biological Sciences. While working toward his master’s
degree, he was chosen to be the department’s horticulturalist.

His campus roots went even deeper when Schmidt met his wife, Carol Morton, Ph.D. ’91, in an entomology course that had them both collecting bugs. The two later married at Funks Grove Nature Preserve. Carol served for 20 years as the Department of Biological Sciences academic advisor. She is now retired yet still returns to campus often, teaching courses in human genetics and human ecology.

Schmidt remains on the job full time, following a routine that is governed by the weather, season, and needs of the University. In a given day he cares for plants in two on-campus greenhouses, and prepares materials for use in labs.

“I am one of the most sensitive people to the seasons,” Schmidt said. “People say that greenhouse plants should always look the same, but they don’t. They are also sensitive in the seasons. Growth slows in the winter, and increases in the summer.”

During the early months of the year Schmidt readies seedlings for planting, as well as native prairie plant species for Funks Grove and the Sugar Grove Nature Center. Located 30 minutes south of campus, Funks Grove is dedicated to restoring prairie plants to Illinois.

“The primary thing I do out there is prairie restoration. We’ve restored close to 40 acres,” Schmidt said. Restoring land to its natural condition is not an easy task. Starting from an agricultural field, it takes much care and effort before a field can begin to resemble the lush, full land it once was.

“We collect seeds from native plants and sow them into the field. Then we have to maintain and improve it over the years through burning, weed control, and planting seeds and plants to try to get the habitat back up to snuff,” Schmidt said. He is dedicated to the work because the landscape is not only enjoyable for individuals who visit, but serves as a native home to many different kinds of animals and insects.

Schmidt also serves on the board of directors of the Parklands Foundation, an Illinois land trust that purchases acres of land to keep them from being developed. “They do wonderful work. We have a group of dedicated volunteers, and around 1,000 members. We work to maintain it in a naturally historic condition,” Schmidt said. Today the Parklands Foundation has preserved almost 3,000 acres of land.

As temperatures rise Schmidt spends more time in the University’s Fell Arboretum, which is a collection of trees and plants spread across Illinois State’s 350-acre campus. He conducts tree walks for the public so regularly that Schmidt has gained an uncanny familiarity with the 120 species of trees within the arboretum.

“I try to show people things that they wouldn’t see if they were walking by themselves, things that aren’t obvious,” he said. One example he gives is the species Betula Lenta—the Sweet Birch—which will emit a wintergreen smell from the stem when it is scratched. Another unique tree on campus is Eucommia, the Hardy Rubber Tree. It has leaves with elastic properties, as they contain conspicuous amounts of latex.

Such scientific and working knowledge has earned Schmidt the affectionate title of “the tree guy” on campus. “If someone says, ‘What’s this tree over here?’ I can ask where it is, and then I can tell them exactly what it is. I would say I am as knowledgeable or maybe even more knowledgeable about the trees than anyone else on campus,” Schmidt said.
“I teach someone else how to see the trees every week, and by doing that I am very familiar with the trees.” said Schmidt, who is also an instructor of a landscape plant course. He and his students have tagged more than 3,000 trees with a small brass plate that identifies the common name, scientific name, and an identifier number.

When not on the Quad or in the greenhouse, Schmidt can be found in WGLT’s broadcast booth. Since 1993 he has appeared on the University’s public radio station Dean of Green program, which is transmitted throughout Illinois and some surrounding states. The program goes beyond addressing gardening issues, as Schmidt answers listeners’ questions on anything from how a dry season is affecting plant growth to the return of the Cicadas, and whether or not they damage trees.

Schmidt’s radio role began when he was asked to come by WGLT and talk about a drought situation. Following that broadcast he was invited back the next week, and the following week, until it eventually became routine. After five years station managers moved his program from its early afternoon slot to the end of Morning Edition so that more people would have an opportunity to listen. The program continued to be broadcast in that time slot for two years before being replayed in the afternoon as well.

“I thought ‘Whoa! Now I am on the two iconic programs of public radio—Morning Edition and All Things Considered. If you know anything about public radio, those are capstone programs, and I am a part of them,’” said Schmidt, who enjoys sharing his extensive knowledge of all things plants related with an audience that reaches beyond the campus community.

He was particularly pleased four years ago when WGLT listeners began to raise questions. “If it interests one person, it likely interests others. So I like it better since we started answering questions,” said Schmidt, who gets more calls for advice as the weather warms.

Schmidt delights in helping listeners get ready for each new growing season, almost as much as he enjoys the hours spent cultivating his own work. Nothing pleases him more than to see a seed grow, be it as knowledge in a classroom he leads or as plants he nurtures across campus.

“It’s a good fit for me,” Schmidt said of his unique and varied role at the University. “It’s what I love to do.”

Known to WGLT listeners as the Dean of Green, Schmidt enjoys answering questions that range from how to deal with a drought to best pruning practices.

Getting off the couch after a long day of landscaping to hear a trailing U.S. Senate candidate speak wasn’t exactly what Zach Koutsky ’06 wanted to do on a sweaty summer night. But his mother said he was going. She was impressed with Barack Obama, a name broadcasters were stumbling over in the 2004 Illinois Democratic primary. Koutsky had already pledged his support to Obama’s competitor, and yet he drove to a Downers Grove golf course with his mother to hear from the last man on the agenda. As Obama opened it up to questions, Koutsky stood up.

“Both of my parents are teachers,” he said. “We’re solidly middle class, and I’m having trouble staying in a state school. This shouldn’t be this hard.”

Barack said he understood, that he and his wife were still paying off their college loans, and he had two young daughters. “It shouldn’t be that hard,” he agreed, before outlining his education plan.

When the meeting wrapped up, Koutsky walked up to ask what he could do. Obama asked if Koutsky would mind going to a couple more meetings that night. Obama was tired of walking into a room alone. Koutsky remembers being led to

How two alums helped Barack Obama become president

BY KATE ARTHUR

Getting off the couch after a long day of landscaping to hear a trailing U.S. Senate candidate speak wasn’t exactly what Zach Koutsky ’06 wanted to do on a sweaty summer night. But his mother said he was going.

She was impressed with Barack Obama, a name broadcasters were stumbling over in the 2004 Illinois Democratic primary. Koutsky had already pledged his support to Obama’s competitor, and yet he drove to a Downers Grove golf course with his mother to hear from the last man on the agenda. As Obama opened it up to questions, Koutsky stood up.

“Both of my parents are teachers,” he said. “We’re solidly middle class, and I’m having trouble staying in a state school. This shouldn’t be this hard.”

Barack said he understood, that he and his wife were still paying off their college loans, and he had two young daughters. “It shouldn’t be that hard,” he agreed, before outlining his education plan.

When the meeting wrapped up, Koutsky walked up to ask what he could do. Obama asked if Koutsky would mind going to a couple more meetings that night. Obama was tired of walking into a room alone. Koutsky remembers being led to
Obama’s beat-up Jeep, where he was handed a “God-awful blue” campaign T-shirt to wear.

And that’s how Koutsky first met the 44th president of the United States.

There were countless other meetings, Koutsky said last fall, as he clicked through dozens of laptop e-mails, answered his BlackBerry, and roamed from room to room in a storefront North Carolina Democratic regional office just 34 days before the historic November election.

The 24-year-old was working in Raleigh for the Obama campaign in a state that hadn’t carried a Democratic presidential candidate since Jimmy Carter in 1976. Koutsky shrugged off trailing poll numbers posted last October, instead talking about grassroots volunteers so committed that when a hurricane created local gas shortages, fuel was siphoned out of supporters’ lawnmowers to get to neighborhood canvassing sites.

Koutsky’s North Carolina roommate and boss was Michael Halle ’06, deputy field director for state headquarters. Halle was responsible for coordinating the efforts of about 150 workers, and thousands of volunteers.

A month before the election Halle was working seven days a week, scrolling through as many as 11,000 e-mails a month. Wearing what seemed to be the campaign uniform of jeans and flip-flops, Halle zipped through the corridors of the state office the night of the vice presidential debate. He walked past a kitchen crammed with cases of bottled water, monster boxes of granola bars, and empty pizza boxes as he was pulled into impromptu meetings.

The two alums who became staff members on the “Campaign for Change” were friends when they shared the Quad at Illinois State. Koutsky had an interest in politics since high school. He majored in politics and government, and sociology. Halle started out studying business, but moved through a few majors before choosing sociology and political science as well.

Koutsky was in student government all four years, served as the student trustee on Illinois State’s governing board, and led the University’s College Demo-
crats. During his last semester he served as campaign manager for State Senator Michael Frerichs, who was the first Democrat elected in his Illinois district in more than 70 years.

Koutsky was visiting campus when he got the call that he’d been hired by the Obama campaign in May of 2007. He walked into the office of Illinois State’s president, Al Bowman, and gave him the news. “Out of all the really cool people I’ve met, Al Bowman is without a doubt the one I’ve most strived to be like,” Koutsky said. “I loved ISU. When I got in, it just felt right.”

Halle has an equally strong appreciation for the University. He was particularly influenced by Sociology and Anthropology faculty Virginia Gill and Richard Sullivan. Gill had students in her sociology class drive to Bloomington’s low-income neighborhoods and then tour the sprawling subdivisions only a few miles away.

“The polarization of wealth was pretty clear,” he said. “Seeing that in such a short drive, seeing how people in one neighborhood had so many fewer options—that was a call to get involved,” Halle said.

After graduation he worked as an intern at the Washington, D.C.-based think tank Center for American Progress, until political connections took him to Iowa. He worked as a field organizer for the 2008 caucus, which ignited Obama’s campaign with a win over Senators John Edwards and Hillary Clinton.

Halle became so familiar with his assigned 13 precincts that he could walk down a street and point out where the Democrats lived, and how they said they’d caucus. The level of organization the Obama campaign commanded in Iowa was the reason Halle wasn’t surprised by their caucus victory.

“Iowa was an amazing experience. I think we were the only people who weren’t surprised by it, and that’s because we were on the ground. The last week I knew we weren’t going to lose to Clinton.”

The day after the Iowa caucus Halle took calls from volunteers who wanted to keep working.

“People called me in tears, saying they never thought they could do anything like this. They wanted to get involved,” he recalled. “People suddenly felt they had the power to influence change.”

Halle kept ahead of the primaries, moving to Kansas, Ohio, Pennsylvania and Indiana, all the time gaining confidence the election effort would lead to the White House. “The campaign found a way to harness grassroots enthusiasm and use it to turn out voters and build massive field organizations,” said Halle, who talked to thousands of voters.

One he’ll never forget is an African-American man he called while trying to get out the vote in Kansas, traditionally a Republican state. The man said he was going to cast his vote for Obama in a school he wasn’t allowed to attend as a child because of segregation.

Koutsky was also inspired by volunteers of all ages, particularly a quadriplegic man who registered voters with the help of his child and service dog. “Our campaign is all warm and fuzzy, but it’s really about hope,” said Koutsky, who called thousands of undecided voters.

He easily handled the objections about Obama’s taxation, health care, or education plans. But there was one sentence that would hit him cold: I don’t know him. “When they say that, it’s a conversation stopper. They’re not ready to have a black president,” said Koutsky, whose political activism started at 16.

It was then presidential candidate George W. Bush visited Koutsky’s Naperville high school with Dick Cheney. Students were asked to line the route to keep protestors at bay. Koutsky did that until he started seeing people he knew. Some
were union members. His parents belonged to a teachers’ union. He’d grown up attending union rallies and protests.

“Halfway through, I peeled off,” he said. “I went home and told my parents I really didn’t like it, and I didn’t think it made sense,” Koutsky said. He had their support when he decided to volunteer for Al Gore. Koutsky wrote postcards, delivered yard signs, and made thousands of long distance calls to Wisconsin voters from his parent’s home.

When Obama was preparing to announce he was running for president in February of 2007, Koutsky volunteered. Three months later he was on the payroll. Before the January 2008 Iowa caucus, he pledged to go without shaving until the nomination was wrapped up, thinking that might be within a month. Six months later, he got the razor out. By November he’d worked in seven states.

“I don’t have a home,” he said last fall, as he sat on a card table chair in a room papered with county maps and phone bank charts. A couch, a fridge, and a donated desk supported by chunks of bricks completed his office decor. Working seven days a week, 100 hours or more, he’d been known to stay there overnight.

“As embarrassing as it is to walk out of your office after just waking up, that’s what hats are for,” he said.

Thirty days before the election, both alums’ offices had the energy of an election night. Both were paid through Nov. 7, when they closed the offices and headed home. Neither of them had any plans for what they’d do after the votes were tallied.

“There’s nothing I’d rather be doing, and I think almost anything would seem pretty easy after this,” Halle said, noting the longest day he put in on the campaign was more than a day—26 hours straight. North Carolina was one of three states too close to call on election night, and wound up in the Obama column by a margin of only 10,000 votes.

The rewards far outweighed such sacrifices, as Halle and Koutsky are grateful to have been part of an election that captured the nation’s attention. To see Obama become a candidate who drew several thousand to rallies across the country was a phenomenon neither alum will ever forget.

Such moments were especially meaningful for Halle, who remembers well the day he cooked a burger and a brat for the future president in an Iowan’s backyard one summer day—with only 10 supporters on hand.
Gladly taught she.
Alumna’s influential career in education began at ISNU

BY SUSAN MARQUARDT BLYSTONE

The fact that Jean Borg ’50 came to Illinois State to obtain her teaching credentials is not surprising, given the majority of women who enrolled in the 1940s arrived on campus with similar aspirations. What sets her apart are the decisions she made, beginning as a student and throughout her career as an esteemed educator.

Borg’s choices resulted in a degree that took her from Central Illinois middle school classrooms to a Florida campus and on to the nation’s educational front-line, where she empowered working teachers. Now an active volunteer in her Clearwater community, she continues to exemplify the University’s fundamental mission of teaching, learning, and public service.

Borg remains committed to seeing students reach their potential under the direction of talented teachers educated at Illinois State, which is why she has created four funds at the University. The Jean M. Borg Endowed Scholarship and Mary R. Borg Presidential Scholarship specifically benefit teacher education students.

The Borg Endowment for the Mary and Jean Borg Center for Reading and Literacy not only advances a College of Education initiative, but stands as a tribute to Borg’s mother, Mary. The Jean M. Borg Campus Enhancement Fund supports the University’s physical environment. It also reflects the influence of Borg’s father, Fred, who instilled in her a love of nature.

“My father loved the outdoors,” Borg said. She remembers fondly how a childhood filled with pets and animals raised at her home in the rural Illinois community of Winchester sparked her interest in biology as a schoolgirl.

“I loved learning, and I loved school. My mother got me into a prekindergarten class when I was not quite 4,” Borg said, confessing it took “a little white lie” to be enrolled so young.

A high school graduate herself, Mary became a strong motivator in her daughter’s life. “I’d always wanted to be a teacher. My mother wanted me at a good teacher school, and she was the force behind me coming to Illinois State,” Borg said.

While her father was hoping Jean would study closer to home, he too was influential in making her collegiate dreams come true. “He had served in the United States Army, and had received a Purple Heart as a World War I veteran,” Borg said. She consequently received a veteran’s scholarship from the state, which made it possible for her to enroll at what was then Illinois State Normal University.

“I was the saver in the family. I had the piggy bank, and I learned how to budget.” Borg said. Yet with the Great Depression ongoing when it came time to enroll,
money was tight. “That scholarship made a big difference, as it paid for books and tuition. I definitely needed it,” Borg said.

With the demand for teachers great, Borg started her degree work in elementary education. Within two years job offers were plentiful. “It was decision time. Mother reminded me elementary education was not what I wanted to do, and encouraged me to make a choice,” Borg said. “I really wanted to be in biology. I transferred, and I loved it.”

A similar dilemma surfaced during her senior year, as Borg was enticed to take a biology teaching position. She chose to remain focused on completing her degree in education, and waited until after graduation to take her first job as a science teacher in Momence Junior High School.

She taught in LeRoy as well before joining the Bloomington Junior High School staff. Robert Knight, then principal of the school, encouraged Borg to complete a graduate degree in counselor education. She transitioned into a counseling position at a high school in Champaign before moving to the faculty ranks in the Department of Curriculum and Instruction at the University of South Florida in 1972.

“All my life I hated snow,” Borg said, noting the climate change was a bonus when she took on duties in Florida. Her work there went beyond the college classroom. She was chosen to serve on a national commission focused on the professional development of teachers in the U.S.

The commission created 17 different project centers across the country, providing direction and administrative support. The work required the centers to develop, field test, and share leadership materials that were based on studies of empirical research for teacher education. Other studies were done into the preparation of test questions to enhance learning.

“The focus was always on a commitment to the development of best practices in teacher education. The subjects were relevant to the day,” such as instilling self-esteem in young women, Borg said. Other topics included classroom management, meaning teacher behaviors conducive to student involvement. Teacher language that is related to student achievement, such as teacher clarity and the use of student responses, was another issue explored.

Borg traveled from coast to coast while with the commission, sharing with teachers in the classroom the wisdom she gleaned as an educator herself. Much of what she imparted came directly from her Illinois State experience, where one of the most important lessons learned was the need to be genuinely interested in the students.

“It’s just wonderful to work with the students,” Borg said, reflecting on how her desire for such an opportunity brought her to Illinois State initially. That enthusiasm carried her through to her retirement in 1993, and motivated her to make such a significant financial contribution to the alma mater she still cherishes.

“Illinois State has meant so much to me. It really is my home. I came because I wanted to be a teacher, and I reached my goal.”
Journey from graduate to donor marked by gratitude

The first recipient of the Jean M. Borg Endowed Scholarship will be chosen this fall. Having benefited herself from financial help as an undergraduate in the 1940s, Jean Borg ’50 will share a special bond with the still unidentified student.

“My scholarship was very important. That’s what made it possible for me to come to Illinois State,” Borg said. “I appreciate so much having been at the University, and I just wanted to give back.” She was able to do so by purposefully planning gifts that will assist students, as well as advance College of Education initiatives.

The Jean M. Borg Scholarship is designated for an upper-classman majoring in the teacher education sequence of biological sciences. The student must plan to teach biology. The Mary R. Borg Endowed Presidential Scholarship is intended for an incoming freshman student majoring in elementary education, with plans to become a teacher. Both will be awarded annually.

“These gifts may be the difference in a capable student coming to Illinois State,” said College of Education Dean Deborah Curtis. “They will also help us widen our applicant pool so that we draw the brightest students.”

Borg’s other two gifts have a more broad reach, as the Jean M. Borg Campus Enhancement Fund provides revenue to protect and enrich the University’s grounds for all to enjoy. The Mary and Jean Borg Center for Reading and Literacy will likewise have an impact far into the future.

The center is located in DeGarmo Hall. Its mission is to improve reading and literacy of all citizens by providing support to local school districts and community groups, employers, regional education offices, and state agencies. The center also provides tutoring to children from kindergarten through high school. Borg knows such personal assistance is critical for students who may be struggling.

“I taught reading for three years at the junior high level. The ones who were behind in their reading came to me,” said Borg, who is pleased her gifts will create positive change in the lives of children and families for years to come.

Beyond the Literacy Development Tutoring Program, Borg’s gift will bolster the center’s Occasional Lecture Series, and enhance learning opportunities for undergraduate and graduate student education through ongoing research. She and Curtis are confident the dollars will advance educational issues crucial to students and educators alike.

“Some of the latest research in literature says one of the biggest reasons we lose students is poor literacy skills,” Curtis said. “Reading must come first. It’s fundamental. That’s not just a slogan, but a fact.”

Curtis noted that Borg’s gifts to the center will “hit every generation,” as children will be tutored, college students will gain clinical experience, and faculty will complete research that shapes policies as well as the classroom curriculum.

“Throughout her career Jean has been quietly engaged in meaningful ways,” said Curtis, who is truly grateful for Borg’s commitment and contributions. “Her gifts carry on her passion, and will ripple out exponentially.”
University Planetarium’s mission is to entertain, educate

Illinois State students aren’t the only ones who come to campus to learn. The University’s Planetarium educates and inspires more than 15,000 visitors annually, including school groups and individuals from communities across the state.

A part of the University’s Department of Physics, the Planetarium opened in 1964. Since then more than 275,000 have come to the white-domed building located at the end of Felmley Hall of Science.

Director Thomas Willmitch oversees the planetarium presentations, including nearly 70 public shows and more than 200 programs for school and community groups annually. School programs and shows for community groups are arranged by reservation.

The Planetarium’s projector places 2,354 stars on the building’s 30-foot dome. The Milky Way Auxiliary effects are also visible, including clusters, eclipses, and binary stars. All come alive through a variety of enriching and entertaining Planetarium programs that change with the seasons.

Multi-media programs that combine narration with slides, video, special effects, and music focus on a single topic. An example includes *Follow the Drinking Gourd*, which examines tales surrounding the Big Dipper.

Sky lectures introduce the daytime and night sky, with specific topics targeted to audiences depending on age. One program, for example, helps early elementary school children locate and name the four principal directions by using the sun during the day, and the North Star at night. In-service teacher workshops are also offered through the Planetarium, which has adult education classes and a traveling telescope program as well.

Live presentations include talks that highlight the stars and constellations found in the current evening sky. Special programs are available upon request, including laboratory exercises or lessons related to special topics, such as the effect of latitude motion. Presentations are offered in six foreign languages.

Admission is $4 per person or less depending on age, with group discounts available. Group showings must be arranged at least two weeks in advance. Individual tickets are sold 20 minutes prior to each show, with a maximum capacity of 100 per presentation. Programs are available throughout most of the academic year.

An alumni perspective

My name is Ashley Mayor, and I am proud to be a lifelong Redbird. As a 2008 graduate of Illinois State, I am beginning to realize the great possibilities that are available to me as an alumnus of this fine university.

Since graduation I have taken a full-time teaching position in the McLean County Unit 5 School District as a third grade teacher. I have opened a new chapter in my life, with a new career, new responsibilities, and new goals, and Illinois State is right by my side. The University continues to support me as an educator by providing clinical students who are eager and willing to come into my classroom to advance my students’ learning.

I have become involved with the Alumni Association Board of Directors, which gives me the opportunity to support alumni programming and have a voice in important matters concerning alumni. In addition to my role with the board, I continue to find ways to give back to the University through speaking at events with the College of Education and Honors Program, and by participating in service events hosted by campus organizations.

I have had the opportunity to grow as a professional, to develop lifelong relationships, and to find support in my career as I “gladly learn and teach.” It is my hope that you too will find a way to remain connected to our alma mater!

Ashley Mayor ’08
Here’s a sampling of alumni events on campus and across the country.
For the most up-to-date event information or to register online, please visit www.IllinoisState.edu/alumni/events. Detailed information for all university events is available on the University Calendar at www.calendar.ilstu.edu.

February
19 Founders Day
Contact: Campus Office
This day marks Illinois State’s founding in 1857. Among events planned is a convocation in Braden Auditorium. Alumni are invited to join faculty, staff, and students for this annual celebration. For more information call (309) 438-8790 or e-mail universityevents@ilstu.edu.

March
5-8 Missouri Valley Conference Tournament
Contact: Redbird Athletics
Don’t miss the Illinois State men’s basketball team in the State Farm Missouri Valley Conference Tournament at the Scottrade Center in St. Louis. A pregame reception will be held in the center before the first Redbird game. Ticket and pregame event information is available online at GoRedbirds.com or by calling (309) 438-8000.

7 Schaumburg Waterworks Pool Party—Redbird Family Night
Contact: Campus Office
Join other alumni and their families at an indoor pool party at the Waterworks Indoor Water Park in Schaumburg. This event will be a splashing good time for alumni, family, and friends of all ages! Admission is $5 and space is limited. Pre-registration is requested.

12-15 Missouri Valley Conference Tournament
Contact: Redbird Athletics

REDBIRD ATHLETICS
(309) 438-3803
Happy to be home again

Alumni of all ages returned to campus during Homecoming last fall. Families and friends gathered for the annual parade, followed by tailgating before the football game. The unveiling of the Alumni Center was another highlight. Additional photos are available online at www.alumni.ilstu.edu/homecoming.

Special thanks to sponsors, including Avanti’s Italian Restaurant; Bank of Illinois; Barnes & Noble College Bookstore; Ferrara Pan Candy Company; and Smoothie King. Don’t miss the chance to return this year for Homecoming on October 12-18. Plan now to come back to your collegiate home!

Alumni support key to success of campus fraternity

by Roy Taylor ’93

Undergraduate and alumni members of Illinois State’s chapter of Tau Kappa Epsilon (TKE) fraternity experienced a year of milestones in 2008. Alumni celebrated the 20th anniversary of the chapter’s return to campus, while the undergraduates moved into a new chapter house purchased with the assistance of a chapter alumnus.

TKE International Fraternity was founded in 1899. When the first national fraternities were allowed at Illinois State in 1969, a local “men’s cooperative” named Al-Azhar became the Mu-Upsilon Chapter of TKE. By the late 1970s membership had dwindled, and it became dormant.

The chapter’s status changed when Mike Milinac ’90 transferred to the University in 1988. Milinac was a member of TKE at Carroll College in Waukesha, Wisconsin, and wished to rebuild the Illinois State chapter. During his first semester, Milinac recruited 22 students to become “founding fathers” of the revived chapter.

In 1989 the TKE colony secured its first chapter house at 302 E. Mulberry in Normal. The chapter was officially rechartered by TKE International headquarters as the reincarnated Mu-Upsilon Chapter on May 5, 1990.

Most fraternity chapters suffer highs and lows over the years. Some will fail, as happened with TKE in the 1970s at Illinois State. But support from the chapter’s alumni is one way to increase the chances of survival. In the late 1990s TKE alumni created a strong alumni board of advisors, which played an integral role in the ongoing success of the undergraduate chapter.

TKE’s Alumni Association President Gary O’Donnell, a physics major in the 1990s, put together a group of investors last spring to purchase a former sorority house at 306 W. Willow in Normal. In August the undergraduate chapter moved into the best facility in which they have ever lived.

The chapter’s alumni advisory board organized a reunion last October to celebrate the 1988 re-establishment of the TKE chapter. Approximately 85 chapter members and alumni attended a reception at the Pub II, tours of the new chapter house, and a dinner.

No undergraduate fraternity chapter can be strong without great alumni support, and a chapter’s alumni cannot ensure the survival of the chapter long term without assisting strong undergraduate members. Illinois State’s TKE chapter is proud to have both.

Editors note: Roy Taylor ’93 is a TKE alum, who served as chair of the TKE reunion committee.
30s
Doris (LaMaster) Mandeville ’33 is retired and resides in Winnebago.

40s
Corliss Norton ’47 worked 15 years as a high school teacher and coach, and was Central Community Unit #4 superintendent for 17 years before retiring. He and his wife, Irene, maintain residences in Clifton and Scottsdale, Arizona.

Jessica Byrne Butts '03 is a staff therapist and case manager with Adult and Child in Indianapolis. She and her husband, Matthew, reside in Greenwood, Indiana.

A journalist for three decades, Robert Gilbert '72 was so driven to write a romance novel that he spent months scratching out the words on lined paper after ending his night shift. The effort resulted in Megan’s Love, which was published in 2008. Gilbert’s story of a reporter and educator who find each other in the Southwest is made more compelling by a companion CD. Determined to immerse his readers in the lives of his characters, Gilbert wrote and composed the orchestration titled Soft Tears: Megan’s Theme to underscore the novel’s drama. The story behind the song is online at www.robertlouisgilbert.com.

Alice (Killian) Wells '64 is dedicated to making a difference from her home in Phoenix, Arizona. She owns a company and is a consultant for teacher training in schools across the country. Her reach is even more broad as president of the board of directors for Soroptimist. The international volunteer organization works to improve the lives of women and girls in local communities throughout the world by offering more than $1 million annually to programs that improve social and economic conditions for females. The problems surrounding women abused by trafficking is one issue Wells will confront during her term.

A novel idea

Illuminating Oprah

Scott Zematis '95 typically works behind the scenes as a lighting director at Harpo Studios. His talent on the job now has him in the spotlight, as Zematis captured an Emmy in 2008 in the Outstanding Achievement in Lighting Direction category. The award for lighting design on the Oprah Winfrey Show was the third Emmy for Zematis, who won for Best Lighting Design in daytime television in 2007 and 2006. A graduate of Illinois State’s School of Theatre, Zematis uses his talents beyond television as well, serving as the artistic associate/lighting designer at Strawdog Theatre Company in Chicago.

Wear in Chicago?

“Conceived in passion. Born in Chicago. Raised on credit card debt.” The tagline for the company founded by Josh Galecki ’05 summarizes his journey from Illinois State student to president of a clothing venture called Loop Apparel. Started with a team of twenty-something pals, Loop Apparel is now in its fourth year of stitching the Windy City’s essence. Some aspect of Chicago is on every clothing item—from the city’s distinctive skyline to riding on the L. The look has caught the eye of Chicago fashion critics, and has an underground following that continues to grow online at www.loopapparel.com.
Linda Thomas ’73 has a dual connection to Illinois State through family and work. She began as a student employee, and still recalls a guard at the flagpole and at the switchboard where she worked following the Kent State incident during the Vietnam War.

“I grew up in Bloomington, and I had a good opinion of Illinois State University even though it seemed large and unfamiliar,” said Linda, who works in the Office of Planning and Institutional Research.

“My affection for Illinois State has only grown. It provides a solid education—past, present, and future—for me and my family, and has been a good employer too for the past 35 years.”

Linda traces her campus connection to an aunt and uncle, Lois (Shakespeare) ’33 and Jim Harris ’40; and another aunt, Helen (Karloski) Thomas ’46. The legacy continued with Linda’s three children.

Her son, Fred Thomas III ’00, is with Ace-Hi Glass Company in Bloomington. He met his wife Heather (Beall) ’99 at Illinois State. Heather is a licensed social worker with the Baby Fold in Normal.

Linda’s daughter, Carrie Thomas ’02, is an attorney in Bloomington. Carrie participated in many Registered Student Organizations at Illinois State. She recalls the way the campus community drew together following September 11th as one of her fondest student memories.

Like his mother, Todd Thomas ’06, is a graduate and employee. Todd works as a computer support specialist/server administrator for the College of Arts and Sciences Information Technology Department.

The family legacy continues, as Linda’s niece, nephew, and great-niece are alumni as well. Deanna Hamilton ’97, like her aunt Linda, was the first of her immediate family to graduate from college. Three of her maternal cousins have attended Illinois State as well. Deanna is a securities regulatory analyst with State Farm Insurance Companies in Bloomington.

Linda’s nephew, Tom Conner ’98, is a partner with Connor & Gallagher Insurance Services, Inc. in Lisle. He and his business partner met after attending Illinois State. Both are members of the Advisory Board for Illinois State’s Katie School of Insurance and Financial Services. Great-niece Christi Fleming ’00 is with Otter Creek Elementary in Elgin, where she teaches a bilingual class of third and fourth graders.

With such deep campus roots, Linda is a strong Illinois State advocate. “I recommend Illinois State to any and all—including prospective students or parents who call my office for statistics,” she said. “I look forward to more memories of Illinois State to come as my great-nieces, great-nephews, and grandchildren seek higher education opportunities.”
Nichole L. (Woker) Campbell '03 is a speech language pathologist with Speech and Language Rehabilitation Services in Bloomington. She resides in Morton with her husband, Jayson.

Jorie Colbert '03, M.S. '05, is a research associate with the Utah System of Higher Education, Office of the Commissioner. She completed her Ph.D. in educational psychology at the University of Utah. She resides in Salt Lake City.

In memory

U.S. Army Sgt. 1st Class Gary Vasquez ’96 died in September of 2008 in Afghanistan from wounds suffered when the vehicle he was in encountered an improvised explosive device. The 33-year-old School of Theatre alumnus of Round Lake was a member of the 1st Battalion, 7th Special Forces Group headquartered in Fort Bragg, North Carolina.
An IRA gift can benefit you and Illinois State University

A change in federal law has made it easier to make donations using an Individual Retirement Account (IRA). Donors who are 70.5 years of age or older may order that all or part of an IRA account be directed to the University as a charitable donation. The gift not only advances Illinois State’s mission but creates a personal tax advantage, as none of the distribution is included in the donor’s income.

Contact your financial advisor to find out how you can take advantage of revised IRA laws to benefit you and the University. Additional information is available online at www.UniversityAvancement.ilstu.edu/irarollover. Illinois State development officers are also able to help. Contact Executive Director of Development Joy Hutchcraft at (309) 438-8184 with questions or to request a brochure.

As a Preview orientation leader, Scott Guerrero is asked for advice by incoming freshmen. “Do not limit yourself in what you can do. Always take the opportunities that are afforded to you. There’s so much here,” Guerrero tells them. These are not idle words, as Guerrero came to Illinois State seeking opportunities.

One of six children, Guerrero was the first to go to college. He was awarded a University Scholarship that allowed him to double major in music education and Spanish. Guerrero hopes to become a choral conductor upon graduating in 2010. He specializes in vocals and piano.

“One of my favorite places to be, whether it is in on-campus or in church, is in front of a piano. It is a great way for me to let go of my stresses and enjoy myself,” said Guerrero, who has also experimented with opera under the tutelage of School of Music Assistant Professor Chris Hollingsworth.

Though he does not necessarily envision a career as a professional performer, Guerrero relishes expanding his talents and keeps an open mind. “My dedication to get involved, showcase who I am as a person, and care about people has helped me develop a profile for myself,” he said.

His involvement in campus ministries and the Illinois State Choir has allowed him to tour Ecuador, France, and Spain. “My experiences have been rewarding in every way. In France I have performed in many great venues, such as the Notre Dame Cathedral, with the Illinois State Concert Choir. Since I have a double major in Spanish, I can go to Spain or Ecuador where it is a primary language and use it as I am learning it,” Guerrero said.

He is also involved in the Music Educators National Conference, Habitat for Humanity, Admissions Ambassador, and University Housing. He is the women’s volleyball student manager, and a member of the men’s club volleyball team.

“Everything I do I try to do to the best of my abilities,” Guerrero said. “If you truly care about the things you participate in and put forth diligent effort, you will obtain the greatest outcome and be the best person you can be.”

More than one life can be changed when you provide financial support that enables a student to complete an education and pursue professional dreams. Make a difference today by contributing to a scholarship. Contact Executive Director of Development Joy Hutchcraft at (309) 438-8041 or by e-mail at jdhutch@ilstu.edu to find out what you can do. Donations can be made online at www.alumni.ilstu.edu/giving.
Reggie has plenty of help cheering on the University's basketball teams, thanks to the spirited members of Red Alert. The student organization puts Illinois State pride on display at each home game, making Redbird Arena a tough place for opponents.
